ELAFLEX – CONCENTRATING ON THE ESSENTIALS

Our Products

Hoses, fittings, couplings, expansion joints and nozzles, setting the standards in industry.

Our Claim

State of the art quality engineering, for the benefit of the customer.

Our Specialty

We combine competence and innovation. Standard-compliant, purpose engineered components and hose assemblies.

EXPERIENCE YOU CAN RELY ON.

**Tradition is no added value.
Our eighty years of knowledge is, though.**

ELAFLEX is a specialist company in safe connections for the handling of hazardous goods and sensitive fluids. Since our foundation in 1923 we have developed into a leading, international specialist of liquid handling equipment. We stand for values which are typical of a family owned company: the spirit of innovation, reliability, continuity and flexibility in thought and action.

With this brochure we address manufacturers of chemicals and pharmaceuticals, hauliers, operators of loading terminals, plant engineers and chemicals distributors. On the following pages we show you some of our capabilities, providing assistance and guidance in our detailed catalogue.

For decades, companies around the world have relied on our wealth of experience and quality engineered durable products. A sound investment both in terms of performance and total lifetime cost benefits.

MEDIA TRANSFER, FOR YOUR REQUIREMENTS.

Setting the Standards.

We are a committed partner to our customers. Knowing their problems and challenges enables us to develop and manufacture products which meet the market requirements.

Our competent design and engineering department and the continuous cooperation with renowned industrial partners such as ContiTech are another important factor, which has led to numerous innovations. Some of them you will see in this brochure.

The active participation in the preparation of official standards, qualified employees, our safety philosophy and a quality that deserves its name are also very important to us. Challenge us, we'll keep it flowing for you!

For product information, resistance charts and catalogue pages please click elaflex.com

SERVICE, WELL RECEIVED.

Delivery times that meet your expectations.

When asked, ELAFLEX customers might define our service by facts such as professional technical advice, reliability and field support.

Service also means to supply a major part of our product range ex works with short lead times. Our recently enlarged 5,800 m² warehouse and a 1,700 m² workshop provides an efficient delivery capability. Several hundred kilometers of hose and several hundred thousand couplings and components such as expansion joints are permanently available ex stock.

According to your specification, we supply either assembled products or single components for self-assembly. Our modular system, developed over the years, is important both for

efficiency and for safe assembling. Hoses and couplings are single source and to the latest industry standards. This ensures compatibility and the possibility to combine complex and special customer design requirements – not unusual for the chemical industry.

Our operational procedures also translate into better service. An up-to-date warehouse management system helps for good inventory accuracy and confirmation of readiness for delivery to the customer. The 'pick by voice' and barcode-assisted stock management minimizes the possibility of incorrect deliveries and speeds up the delivery process.

Well informed, at any time.

On our website elaflex.de/en, all details about our products are at your disposal. Data sheets, ELAFLEX Information sheets, resistance charts and manuals are constantly updated.

Within this brochure, you will find references to detailed product information. When typing that into the search window of our website, the required data is just a few clicks away.

Our online elaflex.de/en/configurators for hose assemblies, rubber expansion joints, nozzles and MannTek Couplings simplify the selection and combination of all components. They are easy and quick to use and help to find your desired product within no time.

CHEMICAL HOSES

Setting the standard: no matter what your medium is, you can rely on our quality rubber hoses 'made in Germany'.

Safe, flexible, lightweight – long service life.

UNIVERSAL HOSES

For multiple applications, suitable for a broad range of media. Nominal pressure 16 bar, braided reinforcements, burst pressure > 64 bar. According to EN 12115.

ELAFLON FEP

Catalogue page 125

Ω
EN 12115
(Ω-C)

Universal hose with seamless, transparent lining of FEP. Suitable for all common media up to +100°C, briefly up to +130°C. Liner material conforms to FDA and USP Class VI.

Cover: light grey with OHM conductive stripe (up to DN 50) or black (DN 63 – 100)

FEP D (without helix):

Pressure hose for discharge and barrel pumps in wet and dry hose systems. Also suitable as reel hose.

Available in DN 13 · (19) · (25)

FEP (with helix):

Suction and discharge hose for IBCs and barrels, containers, rail tankers, tankers and fixed installations.

Available in DN 19 · 25 · 32 · 38 · 50 · 63 · 75 · 100

UTD | UTS | UTL

Catalogue page 121 a

For explanations about 'Ω' or 'Ω/T' conductivity see Elaflex-Information 7.11E

Ω/T
EN 12115

Universal hose with UPE lining. The most used, reliable hose for almost all liquid and pasty chemical and petroleum based products and solvents. Due to the white lining and the patented inner conductive OHM spiral stripe the media remains clean, at the same time providing highest electrostatic safety.

Temperature range -30°C up to +100°C depending on medium.

UTD (without helix):

Pressure hose for discharge in wet and dry hose usage. Also suitable as reel hose provided the inner pressure reaches min. 0,5 bar.

Available in DN 13 · 19 · 25 · (32) · (38)

UTS (with helix):

Suction and discharge hose for IBCs and barrels, containers, road and rail tankers and fixed installations. The strong steel helix ensures that the hose maintains its shape during suction and gravity operations.

Available in DN 19 · 25 · 32 · 38 · 50 · (63) · 75 · 100 · (125) · (150)

UTL (with helix, externally convoluted):

Due to the external corrugations this type is especially flexible. Lightweight suction and discharge hose e.g. for unloading road and rail tankers, also for other applications where special flexibility and easy handling are required.

Available in DN 38 · 50 · 63 · 75 · 100

FLUORFLEX 2

Information 2.08E

Ω/T
DIN 26054

Universal hose with seamlessly extruded, helically wound lining of PTFE virginial, transparent. Suitable for all common media in use. It combines comprehensive chemical resistance of PTFE with the best flexibility. The virgin PTFE ensures clean media, while the embedded patented conductive strip provides safe electrostatic discharge capability.

Unique combination of a hose with helically wound PTFE lining suitable for easy self-assembly. It can be cut to length from the reel and assembled with our special hose fittings in the field. With the flexibility to use clamp type safety couplings lead times are significantly reduced. There is no necessity to stock complete replacement hose assemblies any more.

Temperature -20°C to +150°C depending on medium.

FXD (without helix):

Suction and discharge hose (vacuum max. 0.9 bar at 20°C), Suction and discharge hose for IBCs, barrels, containers, road and rail tankers and fixed installations. Ideal use for applications where highest flexibility and PTFE lining are required. Available in DN 20 · 25 · 40 · 50

ELAFLON PTFE

Catalogue page 127

Ω/T
EN 12115

The star among our EN 12115 'Ω/T' hoses: Electrically conductive, seamless lining of PTFE, for all commonly used media up to +150°C (depending on medium). Liner material conforms to FDA and USP Class VI.

PTFE D (without helix):

Pressure hose for discharge and barrel pumps in wet and dry hose systems. Also suitable as reel hose.

Available in DN 13 · (19) · (25)

PTFE (with helix):

Suction and discharge hose for IBCs and barrels, containers, road and rail tankers and fixed installations. The strong steel helix ensures that the hose maintains its shape during suction and gravity operations.

Available in DN 19 · 25 · 32 · 38 · 50 · 63 · 75 · 100

SPECIALITY HOSES

Highly flexible premium chemical hoses with specific properties, for a variety of requirements.

LMD | LMS

Catalogue page 117

Ω/T
EN 12115

'Blue Band' hose for solvents, with smooth, seamless lining of blue NBR special rubber compound. For most solvents, paints, water lacquer, petroleum products, alcohols, aldehydes, esters and ketones. In short term operation also suitable for aromatic and chlorinated hydrocarbons.

Conforms to EN 12115. Full electrostatic safety. Temperature range -20°C up to +80°C depending on medium.

LMD (without helix):

Pressure hose max. working pressure 16bar. Available in DN 09·13·19·25

LMS (with helix):

Suction and pressure hose max. working pressure 16bar. Available in DN 25·32·38·50·63·75·100·(150)

CHD | CHS

Catalogue page 117

Ω/T
EN 12115

'Lilac Band' - the classic rubber chemical hose, with smooth, seamless EPDM lining. Suitable for more than 75% of all industrial chemicals, also for hot water, cooling water and hot air (not oily).

Conforms to EN 12115. Full electrostatic safety. Temperature range -40°C up to +100°C depending on medium.

CHD (without helix):

Pressure hose for discharge and barrel pumps in wet and dry hose systems. Also suitable as reel hose. Available in DN 13·19·25·32·38·50

CHS (with helix):

Suction and discharge hose for IBC and barrels, containers, rail tankers, tankers and fixed installations. Available in DN 25·32·38·50·63·75·100·(150)

AMX

Catalogue page 123

Ω
IEC 60079-32-1
(Ω-CL)

Ammoniac hose with EPDM lining, for the discharge of water-free, liquid and gaseous ammonia.

Full electrostatic safety.

Burst pressure > 125bar. Temperature range -40°C up to +55°C.

AMX (without helix):

Pressure hose max. working pressure 25bar for the handling of ammonia, for example during the production of fertiliser (urea), chemicals, paper pulp and ammonia water. Available in DN 13·19·25·50

EFL

Catalogue page 113

Ω
EN 12115
(Ω-C)

'FLUORLINE' universal hose, a highly flexible dispenser hose with seamless, transparent lining of THV fluoropolymer. Suitable for most commonly used chemical and petroleum based media. Resistant against diffusion, non leaching, non discolouring, therefore ideal for highly pure and sensitive products.

Corresponds to EN 1360.

Temperature range -40°C up to +100°C.

EFL 16 / EFL 21 (without helix):

Pressure hoses max. working pressure 16bar, for barrel pumps, DEF/ARLA urea refuelling, emission free car refuelling, as a connecting hose in plant engineering and for robot filling systems. Available in DN 16 (no colour marking) and DN 21 (blue-white-blue colour marking).

SD

Catalogue page 123

Ω
ISO 6134

Steam hose with EPDM lining and zinc plated steel braids, for wet saturated steam up to 18bar (210°C) and hot water up to 120°C. For cold water up to 25bar.

Minimum burst pressure 180bar (1:10 safety factor).

Corresponds to EN ISO 6134 - 2A

SD (without helix):

Pressure hose max. working pressure 18 (25)bar.

Available in DN 13·19·25·32·38·50

i FWS PP | FWS PTFE

Catalogue page 181

Quality from our daughter company Dantec (UK)

Also available: Composite hoses (multi-layer thermoplastic hoses with internal and external helix), suitable for the handling of a large number of industrial chemicals, in refineries, tank farms, for the loading and unloading of rail tankers and tankers.

This type is popular when flexibility and easy handling are the main requirements. Various types available, delivery only as complete and tested hose assembly.

Max. working pressure 14bar. Conforms to EN 13765.

Available in DN 25·38·50·65·75·100·150·200·250. DN 100 to 250 also available as Heavy Duty type ('-H').

PAL CHEMICAL HOSES

Traditionally better than the standards.

POLYPAL CLEAN

Catalogue page PAL 03

Ω/T
EN 12115

Universal hose 'CLEAN' with UPE lining* and light-grey EPDM cover. Typical use e.g. for clean chemicals, cosmetics, paints and glues, washing and cleaning products, viscous or powdery products, up to +100°C depending on medium.

White lining with its patented OHM conductive spiral stripe and the clear, electrically conductive cover with OHM conductive stripe. This means that both the transferred media and the factory floor stay clean – ensuring full electrostatic safety.

Conforms to EN 12115.

*UPE lining material conforms to FDA.

PCD (without helix):

Pressure hose for discharge and barrel pumps in wet and dry hose systems. Also suitable as reel hose.

Available in DN 13 · 19 · (25) · (32) · (38)

PCS (with helix):

Suction and discharge hose for IBC and barrels, containers, tanks and fixed installations.

Available in DN 25 · 32 · 38 · 50 · 63 · 75 · 100

POLYPAL PLUS

Catalogue page PAL 01

Ω/T
EN 12115

Universal chemical hose, with seamless, black UPE lining. For almost all liquid and pasty chemical and petroleum based products and solvents up to +100°C depending on medium. Full electrostatic safety.

Conforms to EN 12115.

POLYPAL PLUS m.W. (with helix):

Suction and discharge hose for IBCs and barrels, containers, tankers and fixed installations.

Available in DN 13 · 19 · 25 · 32 · 38 · 50 · 63 · 75 · 100

CHEMOPAL

Catalogue page PAL 09

Ω/T
EN 12115

Classical chemical hose with smooth, seamless lining of chlorobutyl rubber. For a large number of alkalis, acids, acetates, aldehydes, amines, esters, ethers and ketones up to +90°C depending on medium. Full electrostatic safety.

Conforms to EN 12115.

CHEMOPAL o.W. (without helix):

Pressure hose max. working pressure 16 bar. Available in DN 13 · 16 · 19 · 25 · (32) · (38) · (50)

FITTINGS AND COUPLINGS

Comprehensive: Do you want threaded, coupled or flanged couplings – in the dry or wet hose system? We offer a large variety of connection solutions, for highest operational safety.

THREADED AND FLANGED HOSE COUPLINGS

EN 14420, EN 14423, EN 14424, DIN 11851 – we ensure that your hose gets a suitable connection fitting. With Spannfix / Spannloc clamps or ferrules.

i Spannfix, Spannloc and SH

guaranteed fit · easy assembling
reusable system · approved

Catalogue page 297

Spannloc: Safety bolted clamps EN 14420-3 of hot stamped aluminium, bolts and nuts of steel zn cr, or stainless. Available in DN 13–200 mm. Also available as special versions nickel-plated, stainless steel or brass.

Spannfix: Safety pinned clamps EN 14420-3 of hot stamped aluminium, lock pin of stainless steel. Available in DN 19–100. Also available as special nickel-plated version.

Safety crimping ferrule: 'SH' of Stainless steel. Available in DN 13–100. Tamper-proof, non-reattachable.

Threaded Hose Couplings

FFC...SS

Versions: hose tail with integrated, fixed or swiveling (lap joint) flange

Clamps: Spannfix or Spannloc

Materials: stainless steel (also coated), alternatively steel zinc plated and cromated, aluminium, polypropylene or brass.

Standards: EN 14420-4; flanges to EN 1092-1 Type 04/34A or ASME B16.5. Special flanges for saturated steam according to EN 14423.

Sizes: DN 13–200 mm

SFX...SS

i Coatings + Linings

Information 3.18

In the chemical industry large amounts of aggressive fluids are handled. Often, stainless steel does not have sufficient chemical resistance.

To solve the problem, our stainless steel threaded fittings, couplings and flanges are also available in versions where the areas in contact with the medium can be coated.

The preferred solution for most applications is a PFA coating (additional type number ... SSE). Many ELAFLEX standard couplings and flanges are available ex stock with this ruby-red coloured, FDA conform coating.

As an alternative we offer also black E-CTFE coatings, and – for strongly stressed couplings – thick-walled white or black (electrically conductive) PTFE inserts.

Other Threaded Hose Couplings

Besides special threaded hose couplings (examples see right hand side) we also offer a large selection of threaded caps, plugs, reducing adapters, double nipples and welding nipples - details see ELAFLEX catalogue section 3.

DDC DRY DISCONNECT COUPLINGS, SBC SAFETY BREAK COUPLINGS

Better under pressure: With MannTek Dry Disconnect Couplings you can couple the wet hose system under pressure – quickly, safely and without product loss.

In the event of drive-off incidents, MannTek Safety Break Couplings protect against high environmental and equipment damage.

In some cases, it makes sense to combine both products – e.g. on loading arms.

Configure online:

Safety Break away Couplings'

i SBC Safety Break Couplings

Catalogue page 350 a-d

SBC ... SS

Passive safety: SBC Safety Break Couplings (Emergency Break-Away Couplings) are used within hose assembly lines and loading arm systems. They serve to protect against excessive pull forces. Modern construction, low pressure drop. For loading and unloading road and rail tankers, ships; also suitable for offshore use.

At a defined pulling force, the coupling parts separate, valves instantly close on both sides. Product loss, environmental damage and destroyed loading equipment are avoided. Easy replacement of the breaking bolts on site.

Available in 1" · 2" · 2½" · 3" · 4" · 5" · 6" · 8" · 10" · 12"

Types: 'Industrial Series' for use between hose assembly and a fixed point (e.g. loading arms). Will break at axial force or at angle up to 90°. 'Marine Series' for use between two hose assemblies. Will break at axial force. Special type 'SBC-C with cable release': with reusable clamps instead of breaking bolts. The pulling force is transmitted via an integrated cable which is attached to a fixed point.

Available with female or male thread (EN ISO 228 or NPT), with flange (DIN, ASA) or Victaulic coupling. Any combinations possible.

Standard materials for the use in the chemical industry: body of stainless steel, seals FKM or FFKM (Chemraz®, Kalrez®), EPDM, HNBR.

HOSE ASSEMBLING SPECIALIST

A perfect match of hose and fitting.

There are three prerequisites for a perfect hose assembly: suitability and quality of the components, their compatibility with each other and professional assembling.

For decades, this has been our 'core competence'. We ensure that our customers receive a suitable combination of hose and coupling – either for self-assembling or as ready-to-use hose assembly.

Self-assembling: With few exceptions, all ELAFLEX hoses are suitable for this. We provide advice for the selection of the single components. The Elaflex modular system and assembly instructions in our catalogue will ensure easy self-assembling. Hoses must be tested by the assembler according to applying regulations.

Self-assembling makes sense when hoses must be cut in different lengths from the reel, fitted with different hose end couplings in a very short period of time – or for changes and repairs of existing hoses on-site.

Ready-to-use hose assemblies: after consultation, or to your specification, we take care of the rest. Hose cut to length, assembling of hose tail and clamps, mounting accessories,

testing (electrical conductivity and pressure test if applicable), additional marking, quality control and issuing of test certificates.

These services are not only provided by ELAFLEX but also by our stock-holding and experienced distribution partners.

Accessories: for the protection against kinking, abrasion, torsion and heat we can supply a range of additional parts which will help to prolong the service life of your hose assembly.

Additional marking according to customers' requirements is also feasible, e.g. with metal straps and signs. If required, we will also gladly take over the assembly of parts supplied by the client.

DG swivels for the protection against hose torsion

Additional hose assembly marking, e.g. Band-It

HSB "Hosebun" hose saddle for a professional and material-protecting suspension of hose assemblies (see ELAFLEX Information 2.09 E)

KSS Anti-Kinking Spiral with suitable Spannloc KSS clamps. Patented system for tightly bent hoses – protects the stressed area directly behind the coupling (see ELAFLEX Information 2.09 E)

KSS Anti-Kinking System for steam hoses

Fire protection covers

AR-HB Hose Beads for improved abrasion protection and eased hose handling

Special seals

HOSE REELS

Coiled, clean & tidy

ELAFLEX offers suitable hose reels for all mentioned hoses in various standard types or individually manufactured to customer demands and specifications. They are equipped with different return mechanisms – manual, return spring, electric, hydraulic or pneumatic. The high-quality, ergonomic design and construction ensure safe, efficient operation and accident prevention. Less space required, tidiness at the place of use and protection of the material go hand in hand. ELAFLEX hose reels comply with European health, safety and environmental standards and are also available ATEX-certified on request. The materials are selected to match the application: Galvanised or stainless steel for demanding operating conditions.

ZVA Slimline TD:

Flow rate up to 60 l/min.

ZVA 25 Vi/VD/EP:

Flow rate up to 140 l/min.

ZVA RG | ZVA GBZ

Catalogue page 523

Corrosion resistant nozzles with automatic shut-off. Flow rate up to 60 l/min. Inner parts of stainless steel, seals of PTFE.

ZVA RG:

Body red bronze, for corrosive media

ZVA GBZ:

Body bronze, a.o. for drinking alcohol

ZVA AdBlue HV C

Catalogue page 521 a

Nozzle with automatic shut-off, for DEF / ARLA urea solution. Dispensing with magnet adapter Elafix 40 to avoid misfuelling.

Spout OD 19 mm, flow rate up to 40 l/min.

Inner parts stainless steel/plastic, seals NBR/PU/Vi.

ZVA AdBlue HV Composite Body:

Composite Body

Also available:
 ZVA AdBlue LV Composite Body for urea refuelling of light vehicles. For urea bulk refuelling we recommend DDC Dry Disconnect couplings.

ZV 19 + ZV 400 / ZV 500

'Solvent Types'

Catalogue page 543

Catalogue page 535

Manual nozzles, for solvents and chemicals. Inner parts of stainless steel, with special seals:

TD = PTFE, **Vi** = FKM, **VD** = polyurethane, **EP** = EPDM

ZV 19 TD:

Flow rate up to 100 l/min.

ZV 400 (500) Vi/VD/EP:

Flow rate up to 400 (650) l/min

i Swivels

Catalogue page 363

Our nozzles for chemicals are supplied with fixed hose inlets as standard.

To safely avoid hose torsion and to improve nozzle handling, alternatively brass or stainless steel swivels with lifetime lubrication are available in DN 25, 32, 40 and 50, sealing with FKM O-rings, FEP-coated for stainless steel version.

Temperature max. 60°C, max. working pressure 10 bar.

RUBBER EXPANSION JOINTS

Compensating: rubber expansion joints are components for the installation into pipe systems. They serve to reduce vibration and noise, for the compensation of movements and assembly inaccuracies, as well as pipe insert pieces to facilitate inspections.

Our 'ERV' expansion joints are distinguished by a large axial, lateral and angular range of allowable movement, low reaction forces and low inherent resistance. They are perfect noise dampeners and ideally qualified to reduce vibrations – the major part of the piping's structure-borne noise and the low-frequency noise generated by fluids is eliminated. Due to swiveling flanges and smooth bolt holes assembling is easy. High burst pressure, integrated sealing surface with wire core and quality production by ContiTech are advantages that provide for long service life.

From our extensive product range here is a selection of some of the types used in the chemical industry. Due to our large warehouse capacity most ERV types can be supplied ex stock.

ERV-GR

Catalogue page 443

'GREEN BAND' expansion joints for acids, alkalis, chemicals and aggressive chemical waste water.

Liner: CSM, seamless, highly abrasion resistant

Reinforcement: PA textile cord

Cover: CSM

Temperature range (depending on medium) -20°C up to 100°C, temporarily up to 110°C.

Available in DN 25 – 700 mm

Shown example: ERV-GR 80.16, i.e. 'GREEN BAND' expansion joint DN 80 with PN 16 flanges of steel, zinc plated and thick film passivated

ERV-R

Catalogue page 407

'RED BAND' expansion joints for water, drinking water (var. approvals), cooling and waste water with chemical additives, weak acids and alkalis, salt solutions, technical alcohols, esters and ketones.

Liner: Butyl/EPDM, seamless, low permeation

Reinforcement: PA textile cord

Cover: EPDM, ozone proof

Temperature range (depending on medium) -40°C to 100°C, temporarily up to 120°C.

Available in DN 25 – 1000 mm

Shown example: ERV-R 80.16, i.e. 'RED BAND' expansion joint DN 80 with PN 16 flanges of steel, zinc plated and thick film passivated

ERV ... TA | TAS

Catalogue page 467

All ERV types can be fitted with an additional white (electrically insulated) or black (conductive, 'OHM') **PTFE lining** with universal media resistance. After receiving your order, flanges are assembled, followed by the production of the lining.

Additional order number:

... **TA/TA OHM**

Additional order number for PTFE lining and PTFE vacuum support ring:

... **TAS/TAS OHM**

Temperature range: the maximum temperature depends on the chosen bellow type.

Available in DN 25 – 600 mm

Shown example: ERV-W 80.16 SS TA, i.e. 'WHITE BAND' expansion joint DN 80 with PN 16 stainless steel flanges and PTFE lining

i Flanges / Accessories

Flanges: acc. to EN 1092-1, PN 6/10/16/25, ASME B16.5 Class 150/300, BS 10 table D/E/F, VG 95959, DIN 28460 'TW', JIS 5K/10K/16K, SAE J518c, AS 2129.

Flanges with tie rods and angular limiters: tie rods with outer limitation (... **ZS**), tie rods with inner and outer limitation (... **ZSS**) or angular limiters (... **RG**)

Flange materials: steel zinc plated, steel hot galvanized, stainless steel, bronze, aluminium, POM. Coatings with Rilsan® or Halar® or PUR painting possible

Vacuum support spirals and rings of stainless steel: vacuum support spiral for DN 50 – 300 (... **VSD**), vacuum support ring for DN 125 – 600 (... **VSR**), bolted vacuum support ring for DN 500 – 1000 (... **VSRV**).

Further accessories: stainless inner protection sleeve (... **SR**), flame protection covers (... **FSH**), ground protective covers (... **EAH**)

PHARMA

Clean: Our product line 'Hose Assemblies for the Pharmaceutical and Biotech Industries'.

Homogeneous elastomer hose construction with smooth PTFE lining, for highest requirements to cleanliness, hygiene, easy hose cleaning and universal application possibilities.

ELAPHARM®

Hose assemblies for use in the pharmaceutical and biotech industries, as well as for foodstuffs and chemicals.

Your benefit: completely smooth PTFE lining. Flexible and homogeneous, kinking-resistant hose construction (all layers including the lining are permanently bonded to each other).

EPH electrically isolating

Lining: PTFE white, permanently bonded with reinforcement, non el. conductive, seamless, smooth, FDA conform

Reinforcements:

DN 13–19 stainless steel braids, no helix,
DN 25–50 high-tensile, temperature resistant textile braids,
stainless steel helix

Cover: EPDM blue, satin finish, non electrically conductive

Available in DN 13 · 16 · 19 · 25 · 32 · 38 · 50 mm

Supplied as complete hose assembly. Depending on the coupling types selected there are two alternative crimping methods (see right hand side).

Spirally wound marking white-blue-red with all data required by standard.

Suitable for all commonly used media including pharmaceuticals, temperature range -30°C, up to +150°C, depending on medium, working pressure -0.8 bar (vacuum) up to 16 bar.

EPH-OHM electrically conductive

Ω/T

Lining: PTFE black, permanently bonded with reinforcement, el. conductive, seamless, smooth, FDA conform

Reinforcements:

DN 13–19 stainless steel braids, no helix,
DN 25–50 high-tensile, temperature resistant textile braids,
stainless steel helix

Cover: EPDM light grey with OHM conductive stripe, satin finish, electrically conductive

Available in DN 13 · 16 · 19 · 25 · 32 · 38 · 50 mm

Supplied as complete hose assembly. Depending on the coupling types selected there are two alternative crimping methods (see right hand side).

Spirally wound marking white-blue-red with all data required by standard.

Suitable for all commonly used media including pharmaceuticals, temperature range -30°C, up to +150°C, depending on medium, working pressure -0.8 bar (vacuum) up to 16 bar.

Crimping 'free of dead spaces / flared'

Crimped hose coupling with beaded (flared out) PTFE lining (patented process). Totally free of dead spaces, for highest requirements to media purity.

Suitable for all ELAPHARM hose types. Usually used with DIN 32676 (Triclamp) or flanged hose couplings.

Materials: coupling with hose tail stainless steel 1.4404, crimping ferrule 1.4301

Marking on stainless steel coupling ferrule (example): ELAFLEX · Type · DIN · DN · PTFE · Serial Number · Month · Year · PT (bar)

Crimping 'gap minimised'

Crimped hose coupling with flush-mounted hose tail. Minimised gap between lining and hose tail. For high requirements to media purity.

Suitable for all ELAPHARM hose types. Suitable for all coupling types. Surface finish Ra 0.8 µm – on request better.

Materials: coupling with hose tail stainless steel 1.4404, crimping ferrule 1.4301

Marking on stainless steel coupling ferrule (example): ELAFLEX · Type · DIN · DN · PTFE · Serial Number · Month · Year · PT (bar)

HOSE ASSEMBLIES 'CLEAN'

Our new ElaSil® silicone hose assemblies provide the right combination to satisfy high media purity requirements, high flexibility and a large temperature range.

For many sensible applications universal hoses to EN 12115 with externally crimped hose fittings and optimised hose tail to minimise dead volume are sufficient and the right economical choice.

Available sizes DN 13–100 mm, broad choice of threaded, flanged or clamp connection types with integrated hose tail. Short lead times due to availability from stock and in-house assembling and testing.

ElaSil®

Information 1.18

NEW

Silicone hose for high media purity requirements with smooth lining of platinum-cured, translucent, phthalate-free silicone. Highly flexible, kink and vacuum resistant, large temperature range -60°C up to +200°C (depending on medium). Conforms to FDA, USP Class VI and 3-A Sanitary Standard, suitable e.g. for cosmetics, pharmaceuticals and foodstuffs. Steaming out for cleaning and sterilisation possible, autoclavable.

- Shown example: hose assemblies with EN 14420-7 Camlock, DIN 11851 foodstuff thread and DIN 32676 Triclamp connection

ELAFLON PTFE

Catalogue page 127

Ω/T
EN 12115

Universal hose with electrically conductive, seamless lining of PTFE, for all commonly used media up to +150°C (depending on medium).

Corresponds to EN 12115. Lining material conforms to FDA and USP Class VI. Steaming out for cleaning and sterilisation up to +150°C, max. 30 min. (open system).

- Detailed description see page 11 of this brochure
- Shown example: as complete hose assembly with crimped-in DIN 32676 (Triclamp) connection

ELAFLON FEP

Catalogue page 125

Ω
EN 12115
(Ω-C)

Universal hose with seamless, transparent lining of FEP, for all commonly used media Medien up to +130°C (depending on medium).

Corresponds to EN 12115. Lining material conforms to FDA and USP Class VI. Steaming out for cleaning and sterilisation up to +150°C, max. 30 min. (open system).

- Detailed description see page 10 of this brochure
- Shown example: as complete hose assembly with crimped-in DIN 11851 foodstuff coupling

POLYPAL CLEAN

Catalogue page 121 c

Ω/T
EN 12115

Universal hose 'CLEAN' with electrically conductive, seamless UPE lining and light grey cover.

Suitable for a large range of media, up to +100°C. Corresponds to EN 12115. Lining material conforms to FDA. Steaming out for cleaning and sterilisation up to +130°C, max. 30 min. (open system).

- Detailed description see page 14 of this brochure
- Shown example: as complete hose assembly with crimped-in stainless steel with EN ISO 228 thread

FLAWLESS CONNECTION

ELAFLEX supplies hoses for pharmaceuticals, biotech and foodstuffs as complete hose assemblies in fitted lengths, with crimped couplings. We offer a large variety of threaded, flanged or clamp connection types as well as welding ends with integrated hose tail, interface e.g. according to DIN 11851, 11853, 11864, 11866, 11887 or 32676.

Configure online:
hoseconfigurator.elaflex.de

Type ARB
 (Aseptic Screw Connection, Female)
 DIN 11864-1 / 11853-1

Type ARG
 (Aseptic Screw Connection, Male)
